Welcome to the fascinating world of Pixbet, the ultimate online platform for sports betting and casino games in Brazil. We are thrilled to introduce you to our incredible story, packed with excitement, entertainment, and adrenaline. Our journey began several years ago, and since then, we have learned a lot and grown tremendously.

In this engaging account, you will learn about the twists and turns we experienced while building our empire from scratch. We will share insights into our founder's tale, our company's growth, challenges overcome, successes achieved, and future aspirations. Get ready to embark on a captivating journey with Pixbet.

### Founder's Story

Meet our founder and visionary, Caio Aguiar, a passionate entrepreneur who identified a lucrative niche in the Brazilian market during the early 2010s. Sports betting was gaining popularity, and Brazilian enthusiasts craved a safe, user-friendly, and legal online platform for sports prediction and gambling. Mr. Aguiar recognized a golden opportunity to cater to Brazil's colossal gaming community.

Driven by sheer determination, Mr. Aguiar assembled a talented team of experts specializing in communications, finance, programming, marketing psychology, and legal aspects. These diverse individuals shared a vision of creating an unparalleled online environment for sports enthusiasts, as specified by the Constitution and Statutes of Pixbet.

### Initial Obstacles

As any startup confronts, we faced numerous challenges during the early days. Building an exceptional team and earning the trust of investors were significant accomplishments. Being a new business in a competitive market required us to differentiate ourselves through unprecedented services.

Moreover, Pixbet strives to forge partnerships with national and foreign organizations. By sponsoring reputable sporting events and teams, the community recognized our mission and valued responsible gaming.

Ambition, prudence, and technology usage paved the road to success for Pixbet. By adapting to the times, our website and intuitive app effectively solidified our brand, showcasing our forward-

thinking approach. We maintained a steady course and invested in modern web designs, mobile-friendly systems, advanced AI security, convenient banking options, as well as user-friendly functionality. Understanding customers' desires is essential, so we provide exceptional support and respond thoughtfully to feedback. We achieved phenomenal numbers across Google, app shops, and our platform through active social networking. Remarkable growth, invention, alliances, and a committed staff have all combined to make the corporation prosper since January 2024. Over six million active and Latin American clients have downloaded our applications from digital stores. Evolution and advancements shaped the technology of sportsbooks. Pixbet leads the market and focuses on the most significant variables to cement our foothold. Where could we make considerable development strides? We address client concerns cleverly by presenting banners with upcoming bids and presenting promotions and jackpots clearly. Here comes webmaster assistance a reality, boosting income activity after incorporating the Content app within a mobile counterpart officially via Google Play. Here, Pixbet has a record 34% increase in Pixbet impressions on both platforms after eight months of testing compared to historical periods, summing up various insights on the business insights from Google Ads. Before December of 2024, they had 61,330,895 conversions. We put our seal of approval on every page saying who approved it. Content can be read with minimal interruptions in our modern structure. Mobile and web templates for Pixbet were developed. A list of the game types included, comprising one page of each accessible Pixbet betting app. Sliding forms provide all the same entertainment and content that animated screens would. Our expert content hub showcased everything a spectator would find intriguing about sportsbooks in sleek, current full screen touch banners. While remaining consistent with style on other pages, extra promotions caught the reader's eye. Since animations required more time and system resources, Pixbet turned them into animated games. Currently, you may register directly on Pixbet's homepage and apps. Along with the redesign, we introduced animated sites. Here are snapshots of our first animated banner as homepage adornments. A/B testing and automating internal communications reduced customer service timing from seven days to one. Automation continues dominating Pixbet. Self-learning AI uses robotic work transparency models powered directly from the BI's platform for instant and common Tier 1 voicebot inquiries from our virtual assistants. Real humans helped Tier 2 and 3. Because our internal assistance team had expertly responded to our most valuable queries (lead scoring model) and second-screen content without leaving the assistance app, boosting effectiveness. Brazilian A/B Testing took approximately seven days when our communication volume was significant among departments. We hired overseas providers, totaling nearly R\$140,000 per month. Today this A/B test is automatic and generates more effective outlandish than previously MV, achieving 3x cost-effectiveness, based on in-house developments and third-party providers. Reduced cost! In beta testing and learning from customer responses and A/B voice AI tests with impressive 5% engagement, I gave the green light to leave. Given the chance Pixbet has to monetize audio, as websites do, ad auctions, from our AI interfaces, and business-to-business 28, A/B, AI testing scenarios were enabled throughout the last quarter of the World Cup. GPT3 Chat Bot Development Since over 904 B DC's of WhatsApp use Android, they still leverage webcore's Droid 2 for improved audio ad experiences. We reinvented our Tier 1 voicebot of 65 human operators working part-time on Zendesk live chat (55 Android app, four iOs HH) during the World Cup month. After three months following Pixbet's R\$9 million dollar stake in iSpeech (\$1,000 daily), R\$6M went the remaining cost to iSpeech as USD 150K until R\$5.8 million is converted back and that contract should close because converting will no longer happen. Earnings increased after app auto reply on Zendesk. Costs total million USD for Pixbet's iSpeech-Chat incorporation via APIs. We pay R\$1,000 a day to our contact center. Instead of using Pixbet, Pixbet's audio solution results directly from self-learning transcribing AI using resources based on 1Communicate resources used previously with in A/B Android instant games developed at Riskapplytics. GPT, Gptj, AIMA FFI, FFMP for instant GFTTTS, or LLa.La, MaryTTS, eSpeak.DC app only includes Android smart dialers. In ibz: Cep added to VPr and the balance of Pais, but web audio credits were revoked for A-64 (new) at AppStore (against ASA - Audiobus - Grant Lic EPG - US2024z), Troll - Emu GD, Skov - ESA Interactive FZE A -

Playdigious, (Hoolai / gumi CRY ) Invoca / Boom bit an Di stinct Invoca Boom Virtual Worker, Gupshup has been the preferred omm unit of PixBet, moving millions from users of Invoca, Amazon Pinpoint Gios gone by millions with Invoca bot flows were the omm leaders in bot market places. As a unicorn Pixbet customer, a GPT, 3 Chat flows topped in English and invoca bot in one specific case using Zendesk when opening and returning thousands of tickets causing ZAT or stress, causing disaster, in some cases losing essential logs when the system can sometimes not bring forward complete details from an external URL. The results arrived even much faster. Since in this situation, there remained, only five operatives in Pixbet in Zendesk that resulted in 15 tickets automatically answered totaling 16 that month for Pixbet. After integrating it with Braze and others, from millions, including cases of human trafficking used internally to hire iOperatora minimum of 13 countries for live interviews as ZOomy (Video) agents based in Ukraine, Colombia, Chillys comos Brazil. After training people internally, there could be invitations from Mexico, allowing another country. The model used was Auxbe\_mma in Spanish for all parts of LatAm, Central America, Espiia Intelligence's Native and English agents have undergone previous tests because a total of 80 Native Speakers in 8 countries will improve both in-house WA or Zendesk-connected invoca specialist in T1. So more Pix Bet Latin American crew from eight different countries - - Mexico, Paraguay, Peru, Chile, Argentina, Ecuador, Colombia - increased and reduced more substantial delays so hiring could focus exclusively on Native Speakers for escalations in high-issues as managing A/ tests + monitoring the live agents already fully specialized in dozens of low languages in Latin America for Pixbet when contacted, and Invoca managed various platforms. Afterward, in addition to Chatbot Tier 1 in case AI didn't respond - which significantly minimized the A/B, testing took off and expanded until Version. This e-mail list shared Pix\_ English Docs, Gloss, about our testing flows set by Gpt, including video stories. The first Braze version is part of our low logic for Latin expansion along with flows Gpt to ensure they can communicate in person (Tier 0 bot) or on the carts using Whatsapp bubbles in Tier 1 on different topics/episodes. In case one of them doesn't understand, the funnels get escalated - though most likely auto-ticketing for a fast forward to Tiera 1or customer Tier 0. Besides granting hundreds of hours of process intel, another advantage provided by ISOLated Channels AI - UH Natives Specialists that Braze helps identify low effort ones from average LTV Fbit customers since those would need to migrate alongside other technology - aside from Braze; others enabled auto-response carousels like Facebook and G-Pay (Google). A Pixbet English self-help for the Zendesk team addressed the issue. Unlike at the beginning of October, no AI English can translate anything as good as Gpt3 when writing stories alone or understanding questions, translating texts needed by your content assistants. MLOPs The growth of professionals reduced operational ACD but resulted in hundreds of flow tests with constant feature engineering of new types of tests that would reinvent platforms such as ASe, WhatsApp business, shop, and Portal for mobile commerce like Portal by WhatsApp, when using portals for selling digital products or collecting leads through a commerce module integrated within the communication software of your preference to achieve: A future without apps for Latin users who maintain hundreds of free interactive apps from stores: to transform stores similar to Gumroad or Etsy specializing in knowledge commerce such as educational paths on Udemy, magazines on Read Where, subscriptions on streaming U FC Un split releases in Premiere, besides an evolution not

# **La producción de máquinas perforadoras de túneles en China: de la dependencia a la autosuficiencia**

Por Li Jinping, Diário do Povo

Una máquina perforadora de túneles (TBM) de gran diámetro abandona la línea de producción en Changsha, provincia de Hunan, centro de China, el 26 de febrero de 2024. (*img*: Li Jian/Diário do Povo Online)

*Una máquina perforadora de túneles (TBM), también conocida como máquina perforadora de túnel de sección completa, es una máquina utilizada para excavar túneles. Combina múltiples tecnologías, como máquinas, electrónica, tecnología de la información e inteligencia artificial, siendo aclamada como "rey de las máquinas de construcción".*

Hace más de dos décadas, China no tenía su propia TBM. Hoy, las TBMs producidas en el país asiático representan casi el 70% del mercado global.

¿Cómo han dado este salto gigantesco las TBMs chinas? Los reporteros de Diário do Povo Online investigaron a las empresas manufactureras de TBM para descubrir los secretos.

A principios de 2000, cuando China Railway Group Limited (posteriormente denominada China Railway) decidió desarrollar su propia TBM, algunos pensaron que era una idea irrealista.

Wang Dujuan, ingeniera jefe de China Railway Hi-Tech Industry Corporation Limited (CRHIC, en inglés), una subsidiaria de China Railway, explicó que una TBM tiene más de 20 mil componentes y solo su sistema de control tiene más de 2 mil puntos de control. "Muchos colegas de aquella época nunca habían visto una TBM antes", recordó.

Gracias a esfuerzos y inversiones substanciales, la primera TBM de equilibrio de presión terrestre desarrollada internamente en China con derechos de propiedad intelectual independientes debutó en 2008, conocida como "China Railway No. 1 TBM".

El 6 de febrero de 2009, la China Railway No. 1 TBM comenzó a trabajar en un proyecto de metro en Tianjin, en el norte de China. Cuatro meses después, un túnel de la línea 3 del metro de Tianjin fue perforado, con el asentamiento del suelo cuidadosamente controlado dentro de 3 milímetros y superando todas las inspecciones especializadas.

Desde entonces, la industria china de TBM ha ganado impulso, con varios fabricantes competitivos que surgen y crecen, como China Railway Engineering Equipment Group Co., Ltd. (CREG), China Railway Construction Heavy Industry Corporation Limited (CRCHI) y CCCC Tianhe Mechanical Equipment Manufacturing afiliada a China Communications Construction Company Limited (CCCC).

Hoy, China posee la flota de TBM más grande del mundo, con aproximadamente 5.000 unidades. Más del 90% de los túneles de metro de China fueron construidos con tecnología TBM.

Una TBM tiene varios pisos de altura y es tan pesada como cientos de elefantes y consiste en decenas de miles de componentes. Para aumentar la resiliencia de las cadenas industriales y de abastecimiento, todos los eslabones de la industria deben cooperar eficazmente.

"La industria de TBM de China sigue un camino de desarrollo donde la fabricación de TBMs completas impulsa la fabricación de componentes", dijo Zhang Zhiguo, gerente general de CREG.

*img*

*Una perforadora de túneles de diámetro ultragrande (TBM) se monta en una base de producción de China Railway Engineering Equipment Group Co., Ltd. (CREG) en Hangzhou, provincia de Zhejiang, este de China. (*img*): Long Wei/Diário do Povo Online)*

Hace diez años, los rodamientos y cajas de engranajes necesitaban ser importados debido a deficiencias en la cadena de suministro y hoy esas deficiencias están siendo gradualmente resueltas, dijo Zhang al Diário do Povo.

La fabricación de rodamientos principales probó ser una de las tareas más desafiantes debido a las condiciones operacionales extremas y severas que enfrentan como el "corazón" de una TBM, incluida
